Declaration of substances according EC directives and GADSL products of ContiTech Power **Transmission Group**

Dear Customer.

all timing belts, poly V belts and raw edge belts of ContiTech Power Transmission Group are compliant with the following directives:

- 2000/53/EC "End-of life vehicle directive", including latest commission's decision 2008/689/EC
- 2019/1021/EC "Persistent Organic Pollutants"
- 2015/863/EC "RoHS III"
- SJ/T 11363-2006 "China-RoHS"
- 2002/96/EC "WEEE": makes no statements about restriction of substances but has mostly requirements about recycling. This directive is not applicable for us as producers, because we don't manufacture electric parts
- 2005/64/EC Annex V makes no statements about restriction of substances but of reused parts. This directive is not applicable for us as producers, because we don't deliver reused parts.
- 2006/1907/EC "REACH", this includes:
 - Substances of the SVHC-candidate-list 0
 - Substances listed in annex XIV (Authorization)
 - Substances listed in annex XVII (former: "Restriction Directive of Hazardous Substances")

Based on the current information as collected throughout our supply chain, these products do not contain any substance included in the "candidate list" (last update: 16.07.2019) above a concentration of 0.1 % (w/w).

Declarable substances according to GADSL will be declared via IMDS.

For further requests we are readily at your disposal.

Best regards

Björn Stapel
