SINCE 1933

ContiTech Power Transmission Group
Attn. Mr. J-H Quass
Continentalstrasse 1
29451 Dannenberg
Germany

Date : 2026-04-30
Revision : -/-
Our reference : PR-BUC-001313

Subject: Declaration to allow application of 85 mm diameter pulleys with Polyrope.

Dear Mrs. Quass,

Herewith you receive our declaration that we have no objections when Contitech allows application of 85 mm diameter pulleys in combination with Polyrope belts with a flat backside certified by Liftinstituut certificate number NL12-400-1002-166-01

This declaration is prepared to allow immediate application of 85 mm diameter traction pulleys and diverting pulleys for the Polyrope Type certificate NL12-400-1002-166-01 Rev.6. At least before 2027-02-25 where the validity of the certificate ends, an update of the Type-certificate for ISO 8100 is foreseen where we will add the possibility to use not only traction pulleys of 85 mm diameter but diverting pulleys of 85 mm diameter as well. Pulleys of 85 mm diameter are allowed only for the Polyrope variant with flat backside and not for the DP variant which requires Pulleys with a diameter of at least 100 mm.

We hope to have informed you satisfactorily.
